

Castlecool Limited Environmental Policy

Castlecool is a food management and distribution company specialising in all logistics handling, food preparation and control of dry and temperature controlled products for the food processing and export industry. It provides a wide range of support services including temperature controlled storage (cold, chilled and ambient), blast freezing, tempering, packing, food testing and distribution to both national and international destinations.

The Castlecool Limited environmental policy requires all employees to:

- Commitment to relevant environmental legislation and requirements
- continuously improve environmental stewardship through the setting and reviewing of objectives and targets
- optimise the use of energy and material resources
- proactively address the challenges of climate change
- be good neighbours to the community in which we operate
- to prevent pollution

Implementing the Castlecool Limited environmental policy

Implementation of the Castlecool Limited environmental policy is a key priority of management in all our activities

Continuously improving environmental stewardship

Castlecool Limited is informed of environmental issues and legislative changes (Changes in legislation are implemented in to the Castlecool Limited culture).

Moving towards best industry practice

The plant upgrades process optimisation, recycling, energy reduction, reduction of water usage and discharges, reduction of waste, and improvements in ergonomics and safety. This sustained investment programme continually moves us towards best industry practice in all those areas.

Being a good neighbour

Good neighbour relationships continue to be a priority. Our business is essentially local, and we therefore rely on the goodwill and trust of our neighbours. The reduction of noise and waste is an ongoing objective, which we aim to achieve.
